Operations. Intelligence. API.

Everything beyond content — catalog, hiring, leads, security, and headless delivery in one stack.

Products

SKU, brand, pricing, sale price, stock quantity, images, and publish status — full product catalog management.

Services

Service packages with delivery mode, duration, starting price, descriptions, and contact URLs.

Job Listings

Department, location, salary range, skills, responsibilities, benefits, and application deadlines.

Applied Candidates

Resume, portfolio, LinkedIn, experience, CTC, notice period — full applicant pipeline per role.

Contact Form Leads

Inbound lead capture with source tracking and status workflow from new to closed.

Team & Roles

Owner, Content Manager, Marketing, Lead Gen, Developer — granular permission matrix per tenant.

Enterprise Technology Stack

Architecture & Security

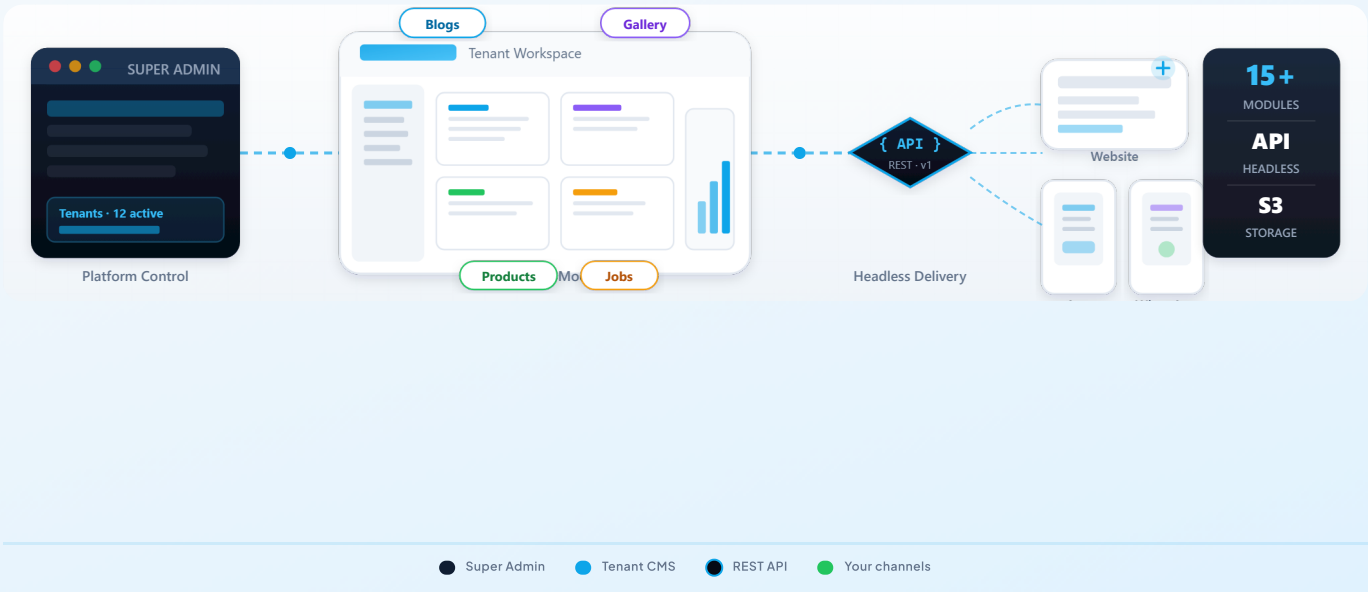

- Multi-tenant isolated data per workspace
- JWT auth with refresh tokens & revocation
- RBAC on every API endpoint
- Redis rate limiting & AES-256 encryption
- Subscription tiers with usage quotas

Public REST API & SEO

- Headless delivery for all content types
- API key auth (x-api-key header)
- Public contact & job apply endpoints
- Meta, OG & Twitter cards on every module
- S3 storage with presigned uploads
