THE OPPORTUNITY

Run your dairy on data, not guesswork.

AxisFarm replaces notebooks, spreadsheets, and disconnected tools with one secure cloud system — designed for milk collection, farmer payouts, and day-book finance in emerging markets.

> *"AxisFarm is a cloud ERP built for dairy. Farms run milking, procurement, sales, and expenses in one portal — while operators onboard tenants, manage subscriptions, and support customers from a central console."*

The pain we eliminate

BEFORE	WITH AXISFARM
Milk registers in notebooks	Structured milking, procurement & sales with history
Farmer balances on paper	Party master + ledger & outstanding credit reports
Herd & health data scattered	Registry, vaccinations, pregnancy & breeding
Weeks to onboard a new farm	Multi-tenant SaaS — onboard in minutes

Built for

Dairy farms

Medium to large farms modernizing ops

Cooperatives

Collection networks & farmer management

Agri-tech SaaS

Operators scaling many tenants

Integrators

Regional dairy ERP rollouts

PRODUCT ARCHITECTURE

Two portals. One platform.

Sell SaaS to many farms, or run one farm with enterprise depth — same product, strict tenant isolation.

CONTROL CENTER

Platform Console

For SaaS operators, support & finance teams

- ✓ Company onboarding & lifecycle
- ✓ Subscription plans (Starter / Pro)
- ✓ Users, roles & permissions
- ✓ Support ticketing
- ✓ Global master data engine
- ✓ Platform settings & 2FA policy
- ✓ Audit log & compliance

Scale from 1 farm to 1,000 — without rebuilding software.

FARM DESK · LIVE

Farm Portal

For farm owners, ops managers & accountants

- ✓ Operations desk (8 daily entry types)
- ✓ Farmers, customers & vendors
- ✓ Livestock, feed & health
- ✓ Milk sessions & procurement
- ✓ Bank, cash & vouchers
- ✓ 8 live business reports
- ✓ Team, masters & support

One login for milk, money, and herd.

SECURITY

JWT auth · RBAC · tenant isolation · API hardening

STACK

React 19 · NestJS · PostgreSQL · Docker-ready

MODEL

API-first · subscription-gated modules · cloud-native

INSIGHTS THAT SELL

Reports that replace midnight reconciliation

Daily Summary	Milk Register	Sales Register	Purchase Register
Expense Summary	Party Statement	Outstanding Credit	Business Statement

All reports LIVE — filter by date, party, and operation type

Platform Console modules

Module	Status
Companies & onboarding	LIVE
Subscriptions & plans	LIVE
Users & RBAC	LIVE
Support tickets	LIVE
Master data engine	LIVE
Audit log & 2FA	LIVE

Value by persona

Farm owner

Daily summary + monthly business statement without waiting for accounts.

Ops manager

One operations desk — no switching between registers.

SaaS operator

Onboard tenants, assign Pro plan, resolve tickets from one console.

Why teams choose AxisFarm

1. **Dairy-specific** — Flows built for milk, farmers & herd — not generic ERP.
2. **True multi-tenant SaaS** — One codebase, many farms, strict data boundaries.
3. **Configurable masters** — Breeds, sheds, units — no redeploy for regional needs.
4. **Modern web UX** — No desktop install. Train staff in days, not months.
